Marcela Chapa

marcelachapag@outlook.com | +1 (830) 461-2126 | Austin, TX | LinkedIn

SKILLS

Proficient Languages: Typescript; Javascript; Python; Scala; SQL; HTML.

Proficient Libraries/Technologies: AWS; GCP; Redis; LangGraph; LangChain; FastMCP; RAG; PineconeDB; Angular; PostgreSQL; SpringBoot; Cypress; Typesense; Playwright; Akka, Kafka; Kubernetes; Docker.

Skills: Spanish (native fluency, oral and written); Team Leadership; Requirements Engineering; Budget & Timeline Estimation; User Story Management; System Design; Software Deployment.

WORK EXPERIENCE

H-E-B Digital **May 2021 – Present**

Senior Full Stack Engineer, Nov. 2023 – Present *Austin, TX*

COST Team (Developer)

- Built the cost-change request system managing $20 billion in annual transactions across various supply chain operations by consolidating three legacy, disconnected systems into a single unified application.
- Engineered highly efficient, highly consistent APIs and services with full-stack features using Typescript, GraphQL, and SQL on GCP to support the supplier-cost-change proposal workflow.
- Led the UI/UX redesign of the platform's core screens and workflows, refactoring the legacy interface in TypeScript by architecting a multi-modal component system that removed 10k+ lines of code.

Jarvis Project (Lead Developer)

- Constructed "Jarvis," an AI-powered Slack assistant accessible through the familiar Slack interface, to serve CI/CD functionality, answer questions, and retrieve company documentation via a RAG pipeline.
- Architected an AI-powered developer dynamic tool routing platform by integrating Claude with a custom Model Context Protocol (MCP) server in Python, serving approximately 5000 internal developers and reducing initial prompt token usage by 90% (approximately 75K tokens).
- Implemented a production MCP server proxy with OAuth authentication and per-client scope/permission management, enabling secure, multi-tenant AI tool access for developers.

LoCo Team (Developer)

- Developed and shipped over 300 full-stack features using Angular, TypeScript, Java (DAO), SQL, and PostgreSQL, bringing location data from three separate systems into a single source of truth application.
- Designed and led the integration of Playwright end-to-end testing into our GitLab pipeline, automating manual QA for critical user flows, proactively detecting and fixing bugs before they reach production.
- Built a REST API integration to sync new location records from LoCo to Lucernex, preserving data visibility during the transition, consolidating data sources, improving data accuracy, and starting the company's move to fully retire Lucernex

Backend Engineer, Aug. 2021 – Nov. 2023 *San Antonio, TX*

EaGLe (Developer)

- Developed a modern microservice orchestration solution in Scala on Google Cloud with 99.99% uptime, replacing a monolithic, on-prem Java backend system, and supporting approximately 200,000 orders per day.

- Incorporated actor model systems and Kafka topics into microservices to create efficient communication coordination between services.

Software Engineer Intern, May 2021 – Aug. 2021 *San Antonio, TX*

COMS/EaGle (Intern Developer)

- Created an Angular dashboard connected to a Kafka event stream that tracked orders through their full lifecycle, from placed to fulfilled to delivered, including changes like substitutions, additions, and cancellations, across a microservice system hosted on Google Cloud.
- Built a live order tracking view using WebSockets, so users could watch incoming orders from H-E-B's own apps, Shipt, and Favor appear on screen in real time.

EDUCATION

University of Texas San Antonio **Degree Received Aug. 2021**

B.S. in Computer Science *San Antonio, TX*

GPA: 3.52/4.0

Accolades and Activities

- Dean's List
- Honors College
- Association of Computing Machinery (ACM) Member
- Calculus Tutor

CERTIFICATIONS

University of Texas at Austin, McCombs School of Business

- PGP in Artificial Intelligence & Machine Learning: Business Applications

NVIDIA

- Fundamentals of Accelerated Computing with CUDA Python

INTERESTS

Running; Cooking; Reading; Painting; Music; Travel.
